

**AMENDMENTS TO THE SPECIFICATION:**

Please delete paragraph [0007] in its entirety and insert the following new paragraph [0007] therefor:

**[0007]** As shown in FIG. 1, the light switch 2 typically has a housing 4 which contains the various components of the light switch 2. The housing 4 is secured to the separate parking brake bracket 6 with a mechanical fastener such as a screw 8. The light switch 2 is connected to the electrical system with wires, cables, pigtails or the like including a connection to a ground of the motor vehicle. Thus the light switch 2 is a separate “off the shelf” component which is attached to the parking brake system during assembly.
